

# FLUSHING OF WATER SYSTEM SCHEDULED

Flushing of the City of Cayce water distribution system is one of numerous requirements within the State Primary Drinking Regulations that apply to domestic drinking water systems. Water system flushing is performed throughout the entire water system in order to insure that the City can supply quality drinking water to our customers.

City utility personnel began systematically flushing the City's water system on September 28, 2009. In an effort to minimize interruption of water service and to minimize inconvenience to you, our utility personnel are assigned to a special early morning work schedule. Flushing of the entire water system is scheduled to be completed by mid-December.
